syslog-ng®
by Quest

THE FOUNDATION OF LOG MANAGEMENT

Organizations use syslog-ng to reliably and securely collect, process and normalize log messages from across their IT environments, and forward them to Big Data stores and log analytics or store them in an encrypted log store.

About One Identity

One Identity delivers comprehensive cloud and on-premises identity security solutions that help customers strengthen their overall cybersecurity posture and protect the people, applications and data essential to their business. Our Unified Identity Platform brings together best-in-class identity governance and administration (IGA), access management (AM), privileged access management (PAM) and Active Directory management (AD Mgmt) capabilities. This holistic approach enables organizations to increase the visibility, control and protection over all their identities. Proven and trusted on a global scale, One Identity manages more than 500 million identities for more than 11,000 organizations worldwide. For more information, visit www.oneidentity.com.

syslog-ng™ Store Box

High-performance, enterprise-class log management appliance

An easy-to-configure, blazingly fast appliance to collect, store, search and audit your logs.

High-performance turnkey appliance
One vendor, quick installation and setup, straightforward licensing, low TCO, great performance and features - all in one package.

Web-based UI for easy configuration and reporting
An intuitive web-based interface for configuring, searching, drilling down and generating reports.

Ultra-fast, full-text search
SSB can index over 100,000 messages per second for sustained periods and process over 70 GB of raw logs per hour.

Unified search
Unified search across multiple appliances, creating one single log data layer and enabling easy access to all your logs.

Content-based alerting
Configure automated searches that run continuously and alert you of important events.

syslog-ng™ Premium Edition

Enterprise-class, reliable, multiplatform log management

A highly scalable and customizable log management solution supporting dozens of platforms.

World-class technical support
Global 24/7 support, extensive documentation, professional services, security updates and training programs.

Encrypted, time-stamped log store
Prevent attackers from modifying logs to cover their tracks, and demonstrate authenticity by preserving the digital chain of custody.

Native installation packages
Install syslog-ng PE quickly using binary package file for supported Linux platforms.

Extended data enrichment
Add contextual information to log entries to help analytics.

Zero message loss
Eliminate message loss in the logging infrastructure with application-level acknowledgement.

syslog-ng™ Open Source Edition

The baseline for log management

Customizable and extensible

High performance

Wide community support

Easy to learn, intuitive configuration syntax

Message parsing and re-writing
